SUMMARY

Engineering leader with 9+ years building and scaling backend systems and leading distributed teams in SaaS and logistics. Known for translating product strategy into high-performing, reliable systems, improving delivery predictability, and driving operational resilience across complex platforms.

WORK EXPERIENCE

BRINGG — *Prague, CZ / Vienna, AT (remote)*

Director of Technology — *Apr 2025 – Present*

- Lead 3 cross-functional teams (7 engineers + 1 QA in total) across multiple core product domains
- Drive alignment between product strategy and engineering execution, improving delivery predictability and team effectiveness
- Present delivery status, risks, and technical strategy to the Executive Leadership Team

Engineering Team Lead — *Aug 2023 – Apr 2025*

- Improved team productivity and code quality by mentoring and managing a distributed backend team of 4 engineers
- Balanced people leadership with hands-on technical ownership, including architecture, code reviews & incident response
- Oversaw new carrier onboardings for *100+ carriers*
- Supported infrastructure migration of legacy Zenkraft systems into Bringg (Heroku → GCP), simplifying platform maintenance, reducing operational risk & *reducing costs by more than 50%*

Senior Software Engineer — *Aug 2022 – Aug 2023*

- Played a key role during the post-acquisition with Bringg to consolidate infrastructure ensuring seamless migration and operational continuity
- Assisted in hiring and onboarding additional backend engineers to expand team capacity
- Mentored more junior engineers, established technical best practices, and supported logistics/carrier operations

ZENKRAFT (Acquired by Bringg) — *Jakarta, ID (remote)*

Python Developer (Freelance) — *Jul 2019 – Aug 2022*

- Took full ownership of production systems, releases, and ongoing maintenance of the Python backend running on Heroku, supporting shipping workflows via Salesforce
- Integrated *30+ third-party carrier APIs* expanding platform capabilities
- Extended framework to simplify addition of new carrier integrations reducing integration time from weeks to days

INDEPENDENT FREELANCE WORK — *Brno, CZ / Bratislava, SK (remote)*

Python Software Engineer / Data Engineer — *Feb 2016 – Aug 2022*

- Delivered *50+ projects* for various SMEs and startups
- Learned how to scope projects, write project proposals, and how to sell myself
- Built APIs, web applications, automation, and web scraping solutions in Python
- Worked directly with business owners as well as technical founders on short- and long-term engagements (Newchip & Sonder)

SKILLS

Technical Skills: Python | Django | FastAPI | Flask | GCP | Heroku | AWS | Docker | CI/CD | PostgreSQL | Redis | MongoDB | Elasticsearch | Celery | Scrapy | Linux | Git | pytest | OpenAPI
Languages: English (C2) | Slovak (C2) | German (A1) | Indonesian (A1)

EDUCATION

MASARYK UNIVERSITY — Brno, CZ
Applied Informatics — *2014 - 2016*

MASARYK UNIVERSITY — Brno, CZ
Bachelor's in Computer Systems and Data Processing — *2011 - 2014*
